About

Computer Science Engineering undergraduate with a strong interest in solving problems and collaborating in team environments. Passionate about software engineering and seeking opportunities to contribute to innovative projects, build secure and scalable software, enhance technical expertise, and contribute to high-impact engineering teams while continuously learning technologies**.**

Education

Jain College of Engineering and Research, Belagavi 2023 – 2027 (Expected)
B.E. in Computer Science and Engineering CGPA: 8.93(till VI Semester)

Projects

Agentic RAG Web Application GitHub

- Developing an AI-powered application for document-based question answering using LLMs and semantic search.
- Integrating Ollama, vector databases, and intelligent tool orchestration for information retrieval.

Classification of Yellow Split Pigeon Pea GitHub

- Developed a web application to classify five Yellow Split Pigeon Pea varieties from images using a CNN built with TensorFlow/Keras and integrated with a Flask backend.
- Implemented image preprocessing, real-time prediction with confidence scoring, and MySQL-based storage for prediction history and variety information.

Inventory & Billing Management System for Small Shops

- Developed a web-based inventory and billing management system to streamline product inventory, sales, customer management, and invoice generation for small businesses.
- Implemented MySQL database integration, secure CRUD operations, and a responsive user interface to enable efficient inventory control and seamless transaction management.

Internships

TechXcelerate Summer Internship Program (SIP) 2026 | July 2026 – October 2026 GitHub
IEEE PELS Student Branch Chapter, KLE Technological University, Belagavi

- Worked on SemaTwin 6G, a **Deep Learning-based simulation for Digital Twin-assisted semantic communication in 6G networks.** Explored wireless channel simulation, LSTM-based SNR prediction, and adaptive resource allocation to improve communication performance.

Technical Skill

Programming Languages: Python, Java, C
Web: HTML5, CSS3, JavaScript, React.js**,** Node.js
Databases: SQL, MySQL, MongoDB
Tools: Git, GitHub, VS Code, Eclipse IDE
AI/ML & Generative AI: Deep Learning basics, LLM, RAG, Vector Databases

Certifications

- Java Springboot Web applications- Delithe (2026)
- Cloud Computing Course– NPTEL Online Certification (Jul-Oct 2025)
- CSS, Bootstrap, JavaScript, PHP Full stack Course- Udemy (Aug 2025)
